Dear Hiring Manager:

I'm excited to be applying for the Data Analyst position at XXXXX. I thrive on digging into complex data sets and producing insightful, data-driven strategic recommendations. I'm eager to turn my talent for analyzing big data into actionable growth strategies for XXXXX.

During studying in udacity, I am keen to continue developing my career in the field of data analysis. I have always been a numbers person, with exceptional mathematics and computer skills.

I am fluent in a number of data management systems and software, including Excel, SQL, PLSQL, python, Tableau, Statistical significance, A/B testing, and data-driven optimization.

As much as I'm into data manipulation, it is the analysis of data that really gets me going. I like to explore the relationships between numbers and translate digits and spreadsheets into stories and become actionable solutions and strategies for businesses, and I take pride in my ability to make data accessible to both executive decision-makers and frontline sales staff.

Thank you for your time and consideration. I'm looking forward to learning more details about the Data Analyst position and about XXXXX. I'm thrilled at the opportunity to use my expertise and experience to identify key data patterns and develop predictive models to help XXXXX achieve its strategic and operational goals.

Sincerely,

Shawky El-gendy
